Matt Trujillo
Tooele County Health & Human Services
Tooele County Courthouse
47 South Main
Tooele, Utah 84074

Dear Mr. Trujillo,

As discussed during the August 16, 1989 meeting regarding the Timberline mill site, Steve Brooks has prepared a summary of the various agreements reached.

The BLM will have a work crew, pumper truck, dozer, and backhoe available early in October to do reclamation.

Matt Trujillo will arrange for a contractor to be on site in October during reclamation to neutralize cyanide in heap leach piles. Matt will also contact USPCI regarding accepting PCV pipe and other materials which may be contaminated with cyanide.

Charlie Dietz will develop and conduct testing methods for monitoring and acceptance of site abandonment. This would include concentration limit for cyanide and type of cyanide analysis.

The BLM will submit a bill to Tooele County for work done to be paid from the bond.

Reclamation is to consist of removing about two feet of heap leach, apply cyanide kill solution, followed by a repetition of this procedure on the following day. Remaining heap leach material will also have cyanide killed. The removed heap leach material will be placed in the pond and area graded to about a 3:1 slope. About six inches of topsoil will be stripped from the area within the fence and placed on the heap followed by seeding.

Any trash or other material not considered to be potentially contaminated by cyanide will be buried on site. Buildings will be removed and preferably given to Tooele County or a non-profit organization. If the buildings are not removed, they will be burned and residue buried on site.

The bond amounts to \$20,871 of which \$3,492 has been obligated to Tooele County.

Sincerely yours,

JORDON C. POPE
